

Stainless steel Hygienox table with tubular rear tie bar

SKU: TLTA-HYEPRR90x60

Description

Our Hygienox 316L-grade stainless steel tables are made specifically for cleanroom environments, giving extreme protection against pitting and crevice corrosion caused by harsh clean down routines (such as chlorine and hydrogen peroxide).

Manufactured as standard in 316L-grade stainless steel or for an ultra-hygienic environment we offer a smoother <0.3 RA finish for the electropolished version. Easy clean features include no horizontal ledges, from the tubular rear tie bar to open corner table top.

The intelligent design and specifications of the Hygienox tables helps not only reduce clean down times but improve productivity. Additional cleaning, pickling and polishing over above normal Teknomex standards (All visible and non visible welds pickled and passivated).

If you can't find the sizes you are looking for then please contact our Teknomexperts and ask about customised or bespoke Hygienox furniture options.

Dimensions

- **Widths:** 900/1200/1500mm
