

Stainless steel Hygienox lectern with rear tie bar

SKU: TLLE-HYEPRR/M60x40

Description

Our Hygienox 316L-grade stainless steel lecterns are made specifically for cleanroom environments, giving extreme protection against pitting and crevice corrosion caused by harsh clean down routines (such as chlorine and hydrogen peroxide).

Manufactured as standard in 316L-grade stainless steel or for an ultra-hygienic environment we offer a smoother <0.3 RA finish for the electropolished version. Easy clean features include no horizontal ledges, from the tubular rear tie bar to fully sloping writing area.

The intelligent design and specifications of the Hygienox lecterns helps not only reduce clean down times but improve productivity. The 600mm width is ideal for holding documents up to A3 in size while the front ledge keeps documents in place.

If you can't find the sizes you are looking for then please contact our Teknomexperts and ask about customised or bespoke Hygienox furniture options.

Dimensions

- **Width:** 600mm
- **Depth:** 400mm
