

## Stainless steel heavy duty table with perforated top

**SKU:** TLWB-1S/P12x60

### Description

Our stainless steel rear tie bar heavy duty table with perforated top is an ideal surface for industries that require sterile, hygienic and contamination resistant surfaces. It is more sturdy with a heavier payload for items that are of a heavier weight.

With both the top and optional shelf perforated for optimum airflow and an all 304L-grade stainless steel construction, it's the perfect hygienic work surface for any clean environment.

However, if you have a particular challenge in mind and we don't offer the solution below please contact our team and ask for our bespoke options!
